

On-site Advisory Services

On-site Advisors Can Provide

Hands-on-deck for a short-term project

Specialized skills not available in-house

Ramp-up for a new initiative without requiring training investment

Strategic counsel on security and risk management best practices

Temporary staffing while searching for full-time hire

There are few organizations that haven't been affected by the current economic climate. Budget cuts – along with staff reductions – have been rampant across industries, leaving many organizations under pressure to meet increased business expectations with fewer resources. Neohapsis can help you drive key business initiatives forward by ensuring you have the right staff in place to support ongoing strategies tied to security, risk management, and IT operations. Typical results our clients see include:

- Economical access to qualified and experienced resources
- Ability to staff short-term tactical projects without increasing headcount
- Temporary coverage of executive-level security and risk-management roles

Neohapsis' on-site advisors deliver expertise and knowledge in a broad range of areas, including:

- **Security** – Our experts leverage years of experience and proven methodologies to enable organizations to protect critical business assets and manage application security, compliance, and infrastructure security.
- **Operations** – With experience across a wide range of functions, Neohapsis delivers operational skills and resources where you need them most, delivering strong business value in terms of cost savings, improved performance, risk reduction, and comprehensive compliance.
- **Risk** – From risk assessment, to program development, to program implementation, Neohapsis offers a broad range of capabilities to manage evolving and complex risk and compliance requirements with greater ease and efficiency.

On-site Advisors, More Than Staff Augmentation

Neohapsis offers a broad range of on-site advisor services to help organizations support short- and long-term projects, allowing you to benefit from our expertise on demand, where and when you need it most. Depending on your requirements, we work independently or as a part of your team and offer a range of advisor staff from junior consultant to principal.

Unlike typical staff augmentation services, our consultants deliver more than just personnel. Neohapsis' experts leverage years of experience and proven methodologies to deliver strong business value in terms of cost savings, improved performance, risk reduction, and comprehensive compliance. Not only do our on-site advisors provide you with the flexibility to staff your projects as needed, they are backed by the entire Neohapsis team and all of our collective expertise. And our commitment to knowledge transfer allows you to continue to benefit beyond the term of the engagement. Throughout every project and in every deliverable, we strive to ensure that our clients fully understand our recommendations, work performed, and their business value.

Senior Security Consultant

- Has 10 or more years of security experience and possesses solid technical and analytical skills
- Can help customers design, plan, implement, support, and monitor IT solutions that are in line with critical business objectives
- Can work with development teams to perform risk assessments and create secure application architectures based on proven technologies and security standards
- Has experience securing the applications and infrastructure for start-up, middle-market, and Fortune 500 clients

Security Consultant

- Has 5-7 years of application, operations, and/or infrastructure security expertise
- Can support IT and information security teams across a broad range of projects

Sample Engagements

PCI readiness and compliance – PCI compliance activities require specific skills to perform the work necessary for initially achieving compliance, then to ensure you maintain compliance moving forward as the necessary activities become incorporated into routine operations. Neohapsis can provide you with on-site advisors for three to six months or even longer to get your PCI compliance program up and running, see you through your PCI audit, and ensure your organization is set up to maintain compliance over the long term.

Enterprise information security technology deployment – When you need to deploy information security technologies enterprise-wide, Neohapsis can provide you with deep technical advisory and project management to help you execute deployment. Our proven expertise helps you navigate around common deployment pitfalls and enables you start taking advantage of the technology's capabilities and benefits faster.

Secure application software development – Neohapsis can help manage software development lifecycles to ensure maximum security of your production applications. Our onsite advisors work closely with your software development teams to understand their current approach and identify areas to integrate the latest secure coding practices and approaches.
